

## JONATHAN MOFFA

CHIEF INFORMATION OFFICER | ARMED SERVICES YMCA

---

Prior to becoming ASYMCA's Chief Information Officer (CIO), Moffa served with the FBI for 25 years, beginning his professional career as an Intelligence Analyst focused on global counterintelligence, insider threat, and counterespionage issues. Moffa was lead analyst for multiple successful espionage and economic espionage prosecutions, receiving the Excellence in Counterintelligence for Insider Threat Award from the Director of National Intelligence and a Meritorious Service Award from the Office of the U.S. Attorney for the District of Columbia. Moffa held multiple FBI intelligence management roles before being appointed to the Senior Executive Service (SES) as Section Chief of the FBI's Counterintelligence Analysis Section.

The FBI Director later promoted Moffa to serve as Deputy Assistant Director and Deputy CIO, leading the FBI's Digital Transformation Office, the FBI's Digital Operations Director's Priority Initiative, and the Office of the CIO. Moffa subsequently became the FBI CIO, responsible for all aspects of the FBI's internal cybersecurity, technology-related strategy, innovation, governance, portfolio management, policy, compliance, supply chain risk management, and data management.

Following his FBI career, Moffa became CIO for the U.S. Department of Energy, Energy Information Administration (EIA), overseeing all aspects of EIA's IT service delivery, user experience, customer support, hardware and software, cloud and data center operations, application development, data management, and cybersecurity. He also led EIA's IT strategy, governance and compliance and was responsible for all aspects of EIA's collection and daily/weekly releases of market-driving energy data.

Moffa graduated cum laude as a Monroe Scholar from the College of William and Mary. Moffa is also a graduate of the Carnegie Mellon University, Chief Information Security Officer Certificate Program.
